Sagar Avudari

sagaravudari34@gmail.com 7997139965 Hyderabad Linkedin Github

Profile

Infrastructure-focused Engineer with strong troubleshooting and backend system expertise. Skilled in diagnosing application and API issues, handling request-response flows, and resolving system errors. Familiar with networking fundamentals, Cisco technologies (basic), and technical support operations. Eager to contribute to infrastructure and support environments.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering, 2021 – 2024
Avn Institute of Engineering and Technoloy

Diploma in Computer Science & Engineering, 2018 – 2021
Jyothishmathi Institute of Technology and science

Skills

Programming Languages :: C, Java, Javascript

Frameworks: Spring Core, Spring Boot, Spring Data JPA, Hibernate

Tools: Maven, Postman, Linux(basic),

Networking & Infrastructure:: TCP/IP, DNS, HTTP/HTTPS, VPN, NETWORK TROUBLESHOOTING

Technical Support:: Troubleshooting, Debugging, Incident Resolution, Log Analysis, API Issue Diagnosis

Projects

Hospital Management System (Spring Boot, JPA)
- Developed REST APIs and handled backend request-response flows
- Diagnosed and fixed API errors and server-side issues
- Debugged exceptions (e.g., NullPointerException) and improved reliability
- Tested APIs using Postman and validated responses
- Simulated real-world troubleshooting and issue resolution scenarios

Library Management System (JDBC, Servlets)
- Built Java-based web application with database integration
- Identified and resolved database connectivity and query issues
- Managed request-response lifecycle and error handling
- Performed CRUD operations with focus on debugging and stability

Professional Experience

Solution Engineering Intern, *M2P Fintech* 03/2025 – 02/2026
Hyderabad
- Supported backend services in a microservices-based Cash Management System
- Diagnosed and resolved API failures, transaction issues, and system errors
- Analyzed logs to identify root causes and improve system reliability
- Worked on REST API request-response handling and debugging
- Assisted in deployment using Docker and CI/CD pipelines (Argo CD)
- Monitored system behavior and ensured smooth transaction processing
